

ESPRIT

LINEAR GAS FIREPLACE

ESPRIT

FOR MEDIUM – LARGE ROOMS

The Esprit linear gas fireplace offers Pacific Energy's highest level of quality, technical innovation, and engineering in a modern landscape.

Create a fireplace that uniquely complements your home with Pacific Energy's exclusive Design-A-Fire system of interchangeable interior options. Whether you choose a dramatic landscape of fire over tumbled glass, or the gentle ambiance of a driftwood logset, your new gas fireplace offers an expansive view of flame set against a backdrop of lustrous porcelain enamel.

Standard one-touch programmable remote controls to provide quick, easy control over heat and added energy savings. Even at the lowest settings, flames are appealingly rich and full to gently warm the room.

SAFETY

When designing any heat source, safety is always at the forefront. At Pacific Energy, we believe that with today's advanced technologies and materials, there's no need to compromise esthetics for safety. That is why we've developed an integrated micro-mesh screen that creates a virtually invisible safety barrier, allowing a clear, unobstructed view of the flame as a standard feature for each model – we would show you, but even the camera can't see it!

EFFICIENCY

Behind the legendary performance of Pacific Energy fireplaces lies craftsmanship, experience and next-generation technology. Large, aluminum-finned heat exchangers maximize heat convection, highly reflective titanium baffles radiate heat and optional dealer-installed fans distribute heat throughout your living space. Heat output and flame are variable, allowing complete control of heating, comfort, and appearance.

Simple touch operation and temperature management.

The Esprit comes standard with an advanced comfort remote control. Using Smart thermostat, your fire-place can automatically modulate flame height to optimize temperature management and room ambiance.

DESIGN-A-FIRE

A SYSTEM BY PACIFIC ENERGY

What is Design-A-Fire?

It's choice. It's a selection of interchangeable components that allow you to customize your fireplace experience and create the exact combination of color, finish, and detail to perfectly enhance your home.
